

Are you troubled with duplicate work such as posting or input of product information?

Do you think that the exchange of product information between suppliers and buyers is efficient at present?

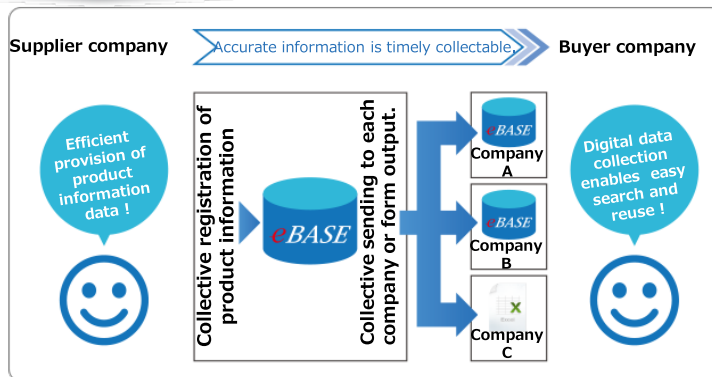

In product information exchange in a supply chain, at present, several different forms are created for each supplier or buyer, and it is carried out by several different means. When posting product information to a different form, artificial mistakes may also occur. Moreover, if the product information is not stored in a database, data retrieval is difficult and so data reuse is difficult. As a result, there are multiple pieces of the same product information data for each in-house system, and it causes a decrease in operational efficiency so far.

After **eBASE** introduction

Efficiency improvement of the product information exchange between companies was achieved.

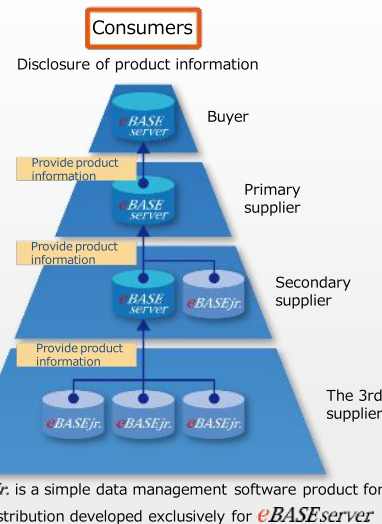

By introducing **eBASE**, the product information provision and collection between companies can be carried out speedily and smoothly. Supplier companies can register their product information at once, send them all at once (or automatically output the forms), and can reduce the load of product information provision. Buyer companies can collect high precision product information timely and at low cost. In addition, it collects in digital data, so you can easily reuse and search data.

eBASE can performs total optimization of product information exchange by industry.

eBASE can build a buyer's efficient product information collection environment including supplier's load reduction of the product information provision, aiming to the efficiency improvement of product information exchange by industry and also total optimization. **eBASE** utilization improves business efficiency and quality of product information collection, management and provision by means of carrying out product information exchange among companies, and makes it possible to disclose and provide information with safety and security to the consumers.

FOODS eBASE, a safe and secure information management system for the food industry, that has the functions of detailed raw-material information from a suppliers, **GOODS eBASE**, a detailed product information management system for daily and miscellaneous goods, that has similar functions as above, and **GREEN eBASE**, an environmental toxin information management system for electronics products such as home appliances, information equipment, chemical substances, etc., are widely provided for each industry use. In addition, product information exchanges in all industries can be easily implemented in a short time by customizing **eBASE** as **eBASEjr**. **eBASEjr** is a simple data management software product for free distribution developed exclusively for **eBASEserver** middleware.

Product Information Management Database System

- Product information management
- Food safety information management
- School lunch allergy countermeasure support management
- Safety information management of daily goods
- Environmental information management
- Asset management
- Customer information management
- Internal control
- Intellectual property management
- Knowledge management
- Housing facilities information management
- Real estate information management
- Integrated management of fashion product information

Revised Sep.2015

eBASE

It is a contents management system featuring "flexible database structure" and "multimedia contents management function". It is utilized in the product database system that is required for a complicated database structure, and creates product information management in the Omni Channel era.

Whether on-premises or cloud, it can operate on a flexible system infrastructure!

Unified management of product information by category

Flexible database structure

For product information management, different database structures are required for different categories, and structural changes are required when new products are developed. eBASE makes it easy to build different databases for different categories, and can add and change the database structure flexibly.

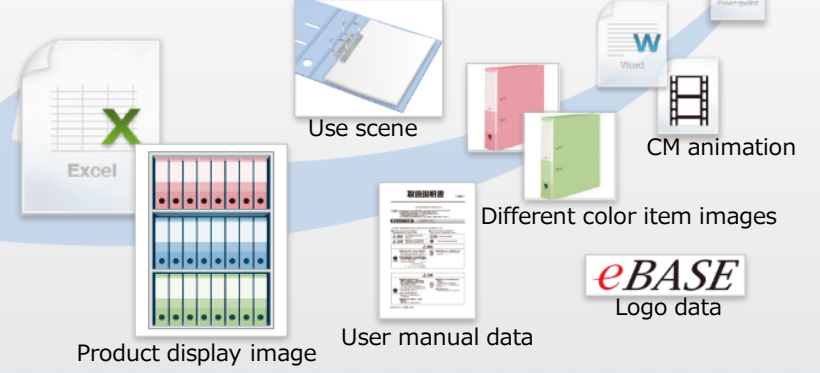

Article category [File] Database structure	Article category [Stapler] Database structure	Article category [Pen] Database structure																																				
<table border="1"> <tr><td>Internal ID</td><td>RTD002-3</td></tr> <tr><td>Product name</td><td>Ring file</td></tr> <tr><td>Size</td><td>A4</td></tr> <tr><td>Number of holes and a hole gap</td><td>2 holes 80mm pitch</td></tr> <tr><td>Material</td><td>PP film covered (file cover)</td></tr> <tr><td>Cover colors</td><td>Blue, red, green</td></tr> </table>	Internal ID	RTD002-3	Product name	Ring file	Size	A4	Number of holes and a hole gap	2 holes 80mm pitch	Material	PP film covered (file cover)	Cover colors	Blue, red, green	<table border="1"> <tr><td>Internal ID</td><td>RTD002-3</td></tr> <tr><td>Product name</td><td>Stapler</td></tr> <tr><td>The needle used</td><td>No. 10</td></tr> <tr><td>Outer size process</td><td>29W x 80L x 64H</td></tr> <tr><td>Number of sheets bound</td><td>About 20-32 sheets</td></tr> <tr><td>Recycled plastic</td><td>78% (cover)</td></tr> </table>	Internal ID	RTD002-3	Product name	Stapler	The needle used	No. 10	Outer size process	29W x 80L x 64H	Number of sheets bound	About 20-32 sheets	Recycled plastic	78% (cover)	<table border="1"> <tr><td>Internal ID</td><td>C-0001</td></tr> <tr><td>Product name</td><td>Erasable ballpoint pen</td></tr> <tr><td>Ink type</td><td>Gel ink</td></tr> <tr><td>Ink color</td><td>Black</td></tr> <tr><td>Material</td><td>Resin</td></tr> <tr><td>Die length</td><td>145mm</td></tr> </table>	Internal ID	C-0001	Product name	Erasable ballpoint pen	Ink type	Gel ink	Ink color	Black	Material	Resin	Die length	145mm
Internal ID	RTD002-3																																					
Product name	Ring file																																					
Size	A4																																					
Number of holes and a hole gap	2 holes 80mm pitch																																					
Material	PP film covered (file cover)																																					
Cover colors	Blue, red, green																																					
Internal ID	RTD002-3																																					
Product name	Stapler																																					
The needle used	No. 10																																					
Outer size process	29W x 80L x 64H																																					
Number of sheets bound	About 20-32 sheets																																					
Recycled plastic	78% (cover)																																					
Internal ID	C-0001																																					
Product name	Erasable ballpoint pen																																					
Ink type	Gel ink																																					
Ink color	Black																																					
Material	Resin																																					
Die length	145mm																																					

Addition of database items by new product development can be flexibly performed.

Erase function: yes (rear end part)

Multimedia contents management

For product information management, document data management such as product images and movies, instruction manuals, inspection certificates etc. is required. eBASE enables unified management of all multimedia contents.

Collective management of product images and manuals, etc.

Rich product master can be operated in collaboration with various other systems.

Print applications

Excel automatic form output & print function

Proposal, negotiation record sheet, POP, a simple flier

Use of Web site contents linked with printing and DTP

Business and stationery

Tablet & smartphone supported

Catalog / brochure data linkage, EC site / Web catalog, CMS function

Mission-critical-system / master-data linkage

Product master data: Internal ID (C-0001), Product name (Erasable ballpoint pen), Ink type (Gel ink), Ink color (Black), Die length (145mm), Erase function (Yes (rear end part))

Customer master data

Employee master data

Mission-critical system master data management assuming the operation support of various master jurisdiction departments.

MDM Master data Management

- Sales management system: Product master, Customer master, Employee master
- Logistics management system: Product master, Customer master, Employee master
- Production control system: Product master, Customer master, Employee master
